

Aim:

Write a Python program that prints the right-angled triangle pattern as shown in the example. This program prompts the user to input an integer, which in turn determines the number of rows in the pattern

Example:

If the given integer is 5, then the pattern would be

Input format:

- The input is the integer that represents the number of rows in the pattern.

Output format:

- The output is the pattern that resembles the pattern as shown above.

Source Code:

print_pattern.py

```
a = int(input(""))
for i in range(1, a+1):
    for j in range(1, i+1):
        if j==1 or j==i or i==a:
            print("*",end=" ")
        else:
            print(" ",end=" ")
    print()
```

Execution Results - All test cases have succeeded!

Test Case - 1
User Output
5
